

It is an individual assignment

Make a PPT on **any one topic from those listed** below within maximum 10 slides including everything for **CA1** submission within 31st December, 2025, 11:59 p.m.

- Maxima and Minima of Single-Variable Functions
- Rolle's Theorem
- Lagrange's Mean Value Theorem (MVT)
- Matrix and System of Linear Equations

Submission link will be provided through Google Classroom.

To create a professional and engaging PowerPoint presentation, follow these steps:

1. Define the Purpose and Audience

- Determine the main objective of the presentation.
- Tailor content to the audience's level of expertise and interest.

2. Organize Content into 10 Key Slides

Slide 1: Title Slide

Include the presentation title, your name, roll, course, and date.

Slide 2: Agenda Slide

List the main topics covered in the presentation.

Slide 3: Introduction

Provide background information and set the context.

Next Slides: Main Content Slides

Present key points, supporting data, visuals, and explanations.

Use one topic per slide, focusing on clarity and simplicity.

Next Slide: Case Study / Example

Provide a real-world example to illustrate key points.

Next Slide: Conclusion Slide

Summarize the main takeaways.

Next Slide: Q&A and Thank You Slide

Invite questions and include a "Thank You" message.

3. Design the Slides

- Theme: Choose a clean and consistent theme.
- Fonts: Use simple, legible fonts like Arial or Calibri.
- Colour Scheme: Use 2-3 colours for a professional look.
- Visuals: Include charts, graphs, and images to break up text and add visual interest.

4. Keep Text Concise

- Aim for bullet points with no more than 7-9 words per line.
- Use visuals and icons to replace text where possible.

5. Review and Practice

- Proof read for errors, timing, and flow.
- Practice presenting to make sure each slide's content can be covered within the allotted time.
